Preliminary Monthly Financial and Economic Dashboard

Issued January, 2015

Reporting Period: FYE 2015, December 2014

DECEMBER OUR CASH…

Balances as of December 31, 2014

GENERAL FUND – CASH & INVESTMENTS

Dec 2014	$ 5.339 M
Dec 2013	$11.576 M
Avg. Dec FY 2011-13	$11.577 M
Unavailable Cash	$ 5.339 M
Available Cash	$ 0.000 M

STREET FUND – CASH & INVESTMENTS

Dec 2014	$ 3.548 M
Dec 2013	$ 3.709 M
Avg. Dec FY 2011-13	$ 1.840 M
Unavailable Cash	$ 3.548 M
Available Cash	$ .000 M

CAPITAL FUND – CASH & INVESTMENTS

Dec 2014 (incl. URA draw requests)	$10.192 M
Dec 2013	$ 4.191 M
Avg. Dec FY 2011-13	$ 3.375 M
Unavailable Cash	$ 3.721 M
Available Cash	$ 6.471 M

WATER FUND – CASH & INVESTMENTS

Dec 2014 (incl. URA draw requests)	$ 9.565 M
Dec 2013	$ 9.870 M
Avg. Dec FY 2011-13	$10.131 M
Unavailable Cash	$ 9.124 M
Available Cash	$ .441 M

SEWER FUND – CASH & INVESTMENTS

Dec 2014 (incl. URA draw requests)	$38.660 M
Dec 2013	$ 8.402 M
Avg. Dec FY 2011-13	$ 4.278 M
Unavailable Cash	$38.660 M
Available Cash	$ 0.000 M

DECEMBER BUILDING PERMITS AT A GLANCE…

NEW COMMERCIAL BUILDING PERMITS ISSUED

Dec 2014/Total for Fiscal Year 2015	1/5
Estimated Permit Value for Month	$ .025 M
Dec 2013/Total for Fiscal Year 2014	1/6
Estimated Permit Value for Dec 2013	$ .410 M

SINGLE FAMILY BUILDING PERMITS ISSUED

Dec 2014	14
Dec 2013	5
Five-Year Average for Dec	11.4
Thru Dec for FY 2015	49
Thru Dec for FY 2014	41
Five-Year Average (FY'10 – '14)	30.2

ESTIMATED TOTAL VALUE OF BUILDING PERMITS ISSUED

Estimated Total Value for FY2015	$19.634 M
Estimated Total Value for FY2014	$13.679 M

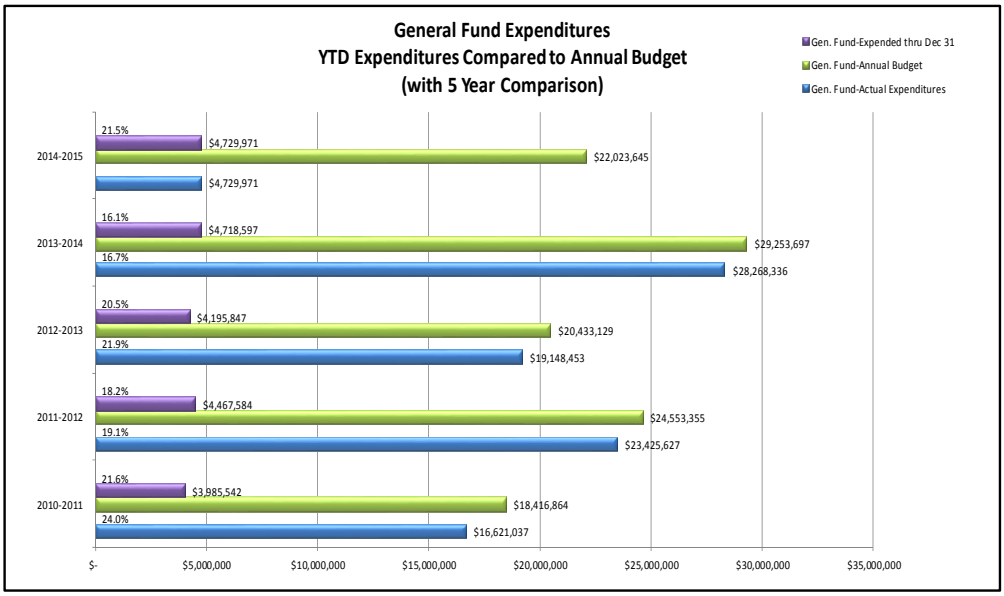
General Fund Revenues

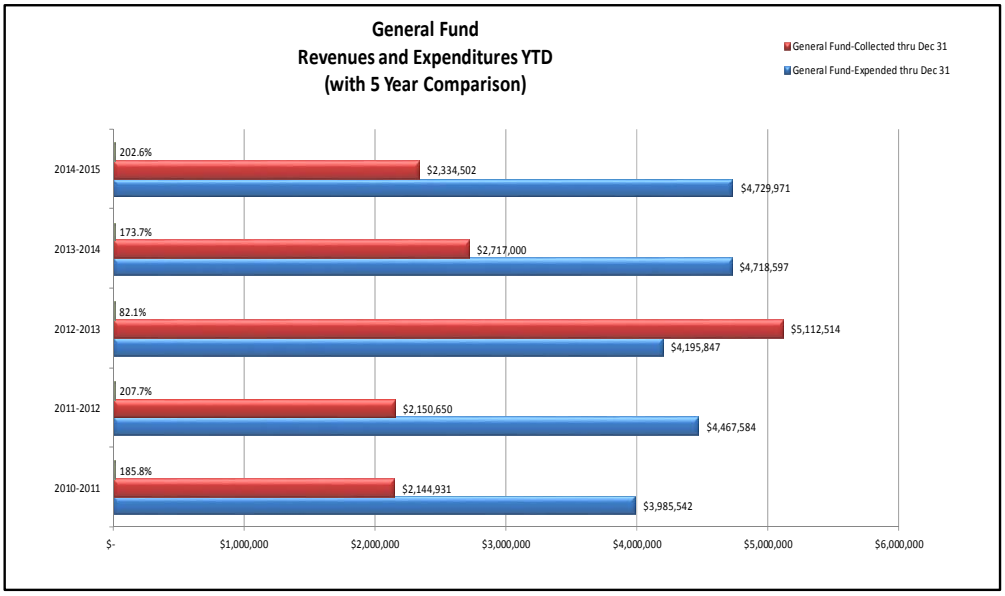
What we are seeing: General Fund revenues are at 10.6% of budget 25.0% through the year. This is typical, as the General Fund is heavily supported by property tax dollars, and the 1st of 2 payments won't be received until January 2015. Total building dept. revenues are at 26.3% of budget. Building permit revenue is at 24.1% of budget while electrical, plumbing & mechanical permits are at 32.1%.

What we are projecting: The City will be monitoring revenue sources closely, and will be making necessary adjustments to spending if warranted.



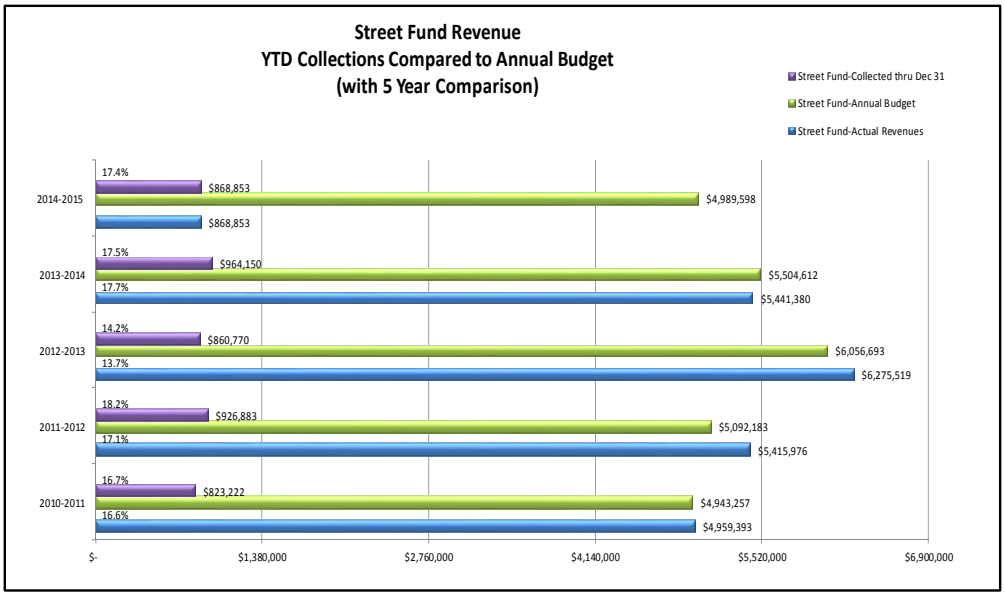
General Fund Expenditures

What we are seeing and projecting: The General Fund is 21.5% spent 25.0% through the year. The prior 4 yr. average for this same time of year is 19.1%. The City regularly monitors spending. Monthly reviews, comparing budgeted to actual expenditures, are conducted to identify unusual deviations from where the City anticipates that it should be in the annual cycle. The General fund is the largest fund within the City. It includes police and fire protection as well as department support services.



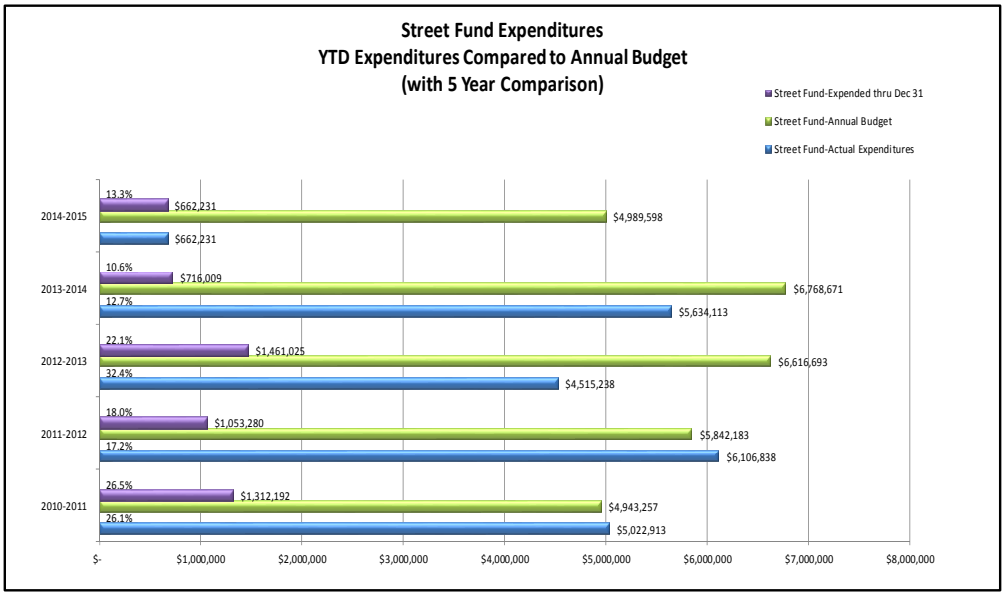
Current General Fund Revenues and Expenditures

What we are seeing: For December, the City's General Fund revenues are behind expenditures. This is typical for the General Fund, which is heavily supported by property tax dollars (64.7%). The first payment won't be received until January 2015. The City has reserves (i.e. savings) to fund operating expenditures for the first 4 months of the fiscal year until we receive the property tax revenue. The City will continue to closely monitor revenues, update projections and adjust spending as necessary for the 2014-2015 fiscal year.



Street Fund Revenues

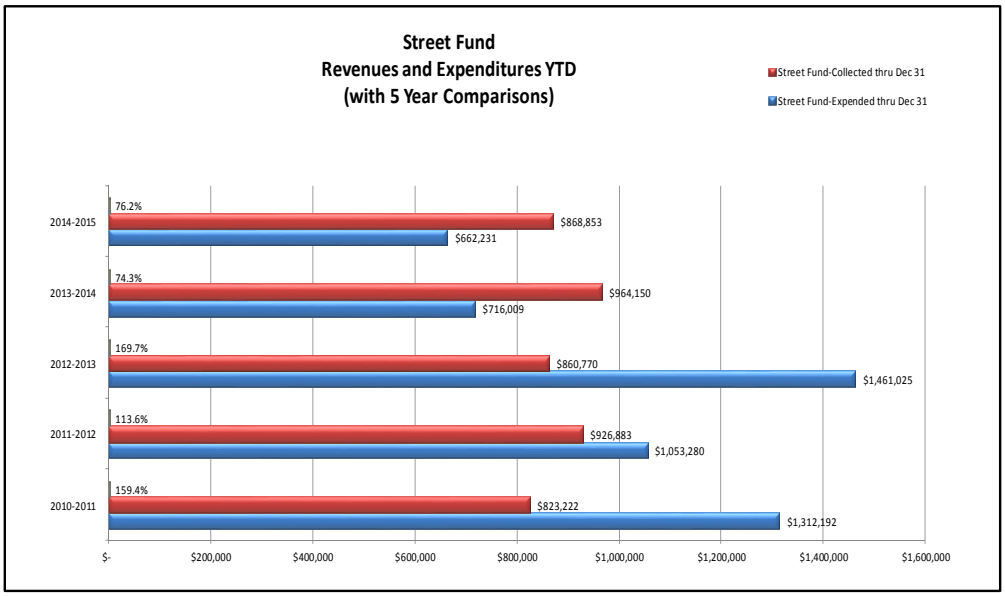
What we are seeing and projecting: The Street Fund revenues are at 17.4% of budget 25.0% through the year. Property taxes, highway user revenue and road & bridge tax account for 72.2% of the Street Fund's budgeted revenues. These payments are received quarterly. The City won't receive property tax dollars until January 2015. The previous 4 year average at this point in the fiscal year is 16.7%.



Street Fund Expenditures

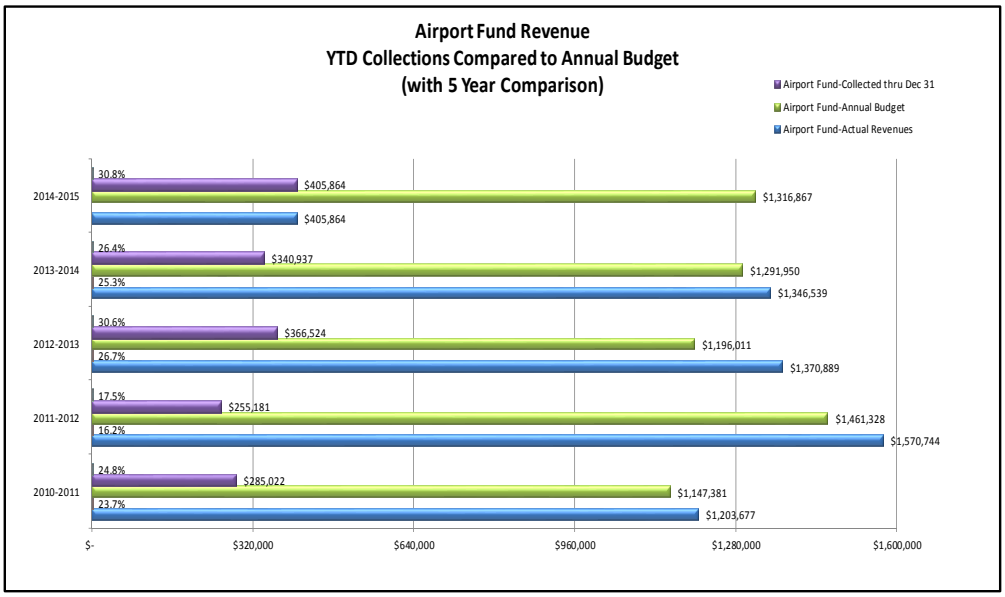
What we are seeing and projecting: The Street Fund is 13.3% spent 25.0% through the fiscal year. The previous 4 year average is 19.3% through December.

What this means: The Street Fund's expenditures for the current year do not include as many major construction projects as have been budgeted in previous years. Street expenditures typically accelerate during summer months when the temperature is compatible with laying asphalt and seal coating.



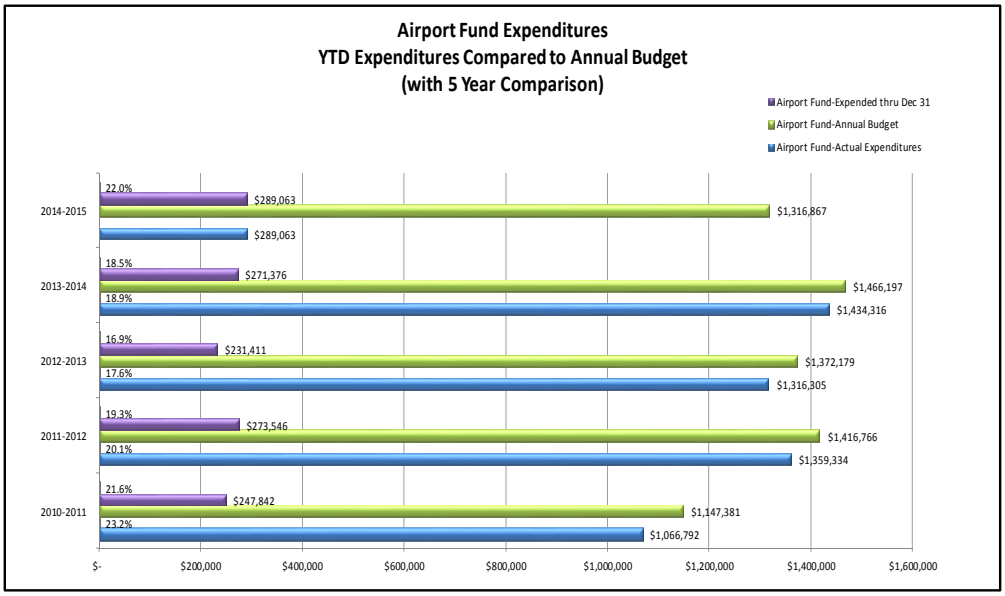
Current Street Fund Revenues and Expenditures

What we are seeing and projecting: The Street Fund has more revenues than expenditures at this time of year. This is typically the case.



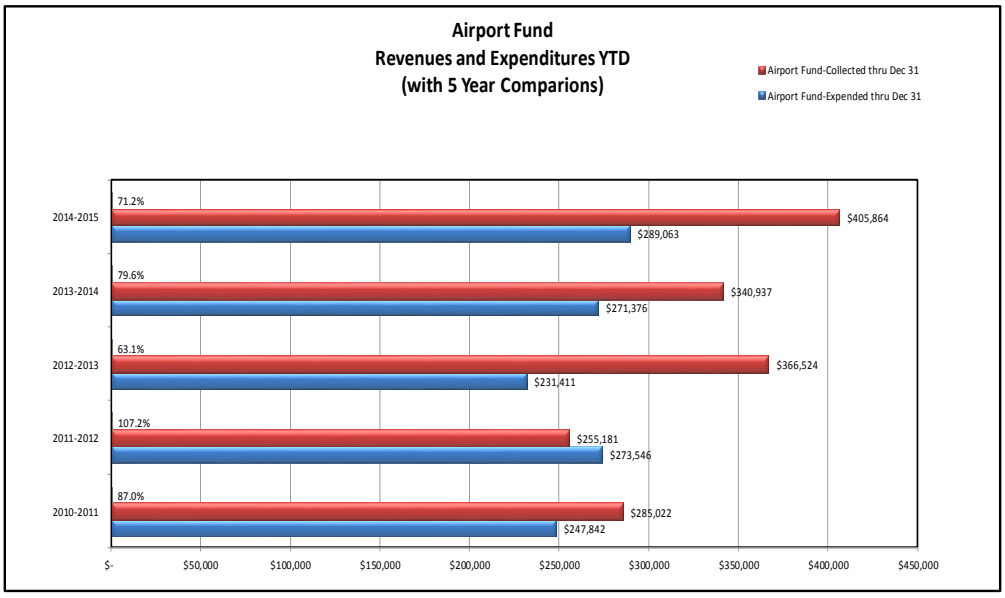
Airport Fund Revenues

What we are seeing and projecting: The previous 4 year average of actual revenues receipted this time of year is 24.8%. For fiscal year 2015, the YTD receipts are 30.8% of budgeted revenues. Landing fees, terminal rentals, concessions, ARFF fees, and franchises make up 37.7% of the budgeted revenue in the Airport Fund. The City has received 43.5% of this revenue 25.0% through the year. Hanger rentals for the fiscal year are billed at the beginning of the year and accelerated that portion of airport revenues. The Airport Fund is supported with property tax dollars from the City and matching revenue from the County. These revenues make up over 55.7% of total budgeted revenues.



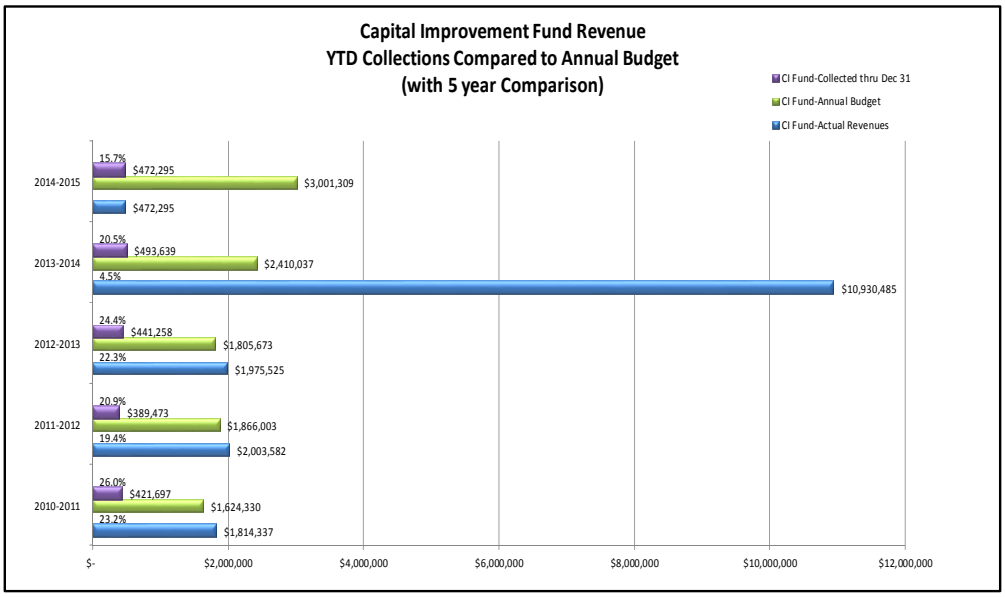
Airport Fund Expenditures

What we are seeing and projecting: The current year-to-date expenditures at the Airport are 22.0% of budget, and are above the previous 4 year average of 19.1%. The budget for 2015 has few capital expenditures projects planned from this fund. This funds expenditures cover maintenance and operation expenses. Generally capital expenditures for Airport projects are accounted for in a separate fund.



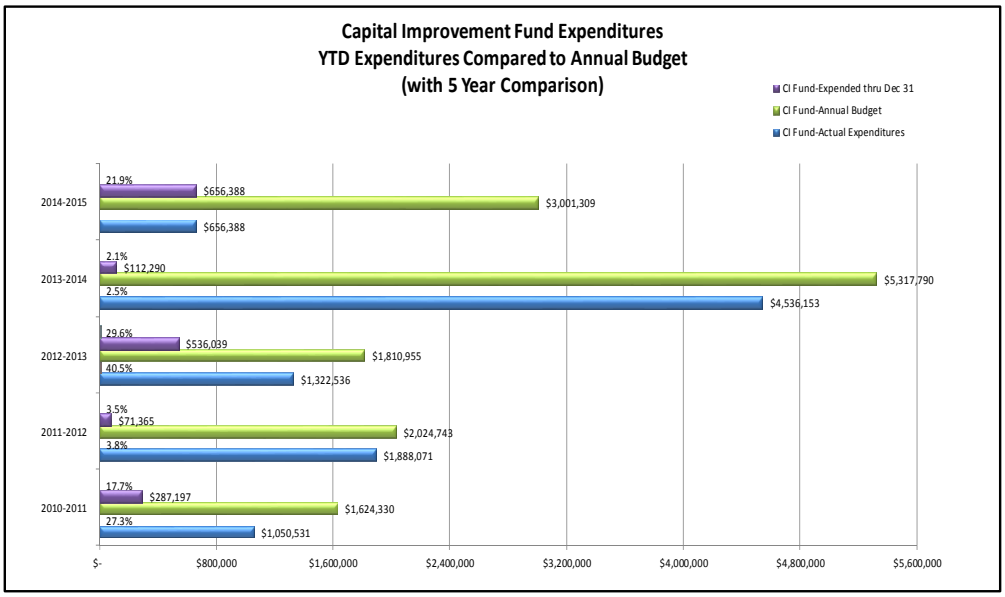
Current Airport Fund Revenues and Expenditures

What we are seeing and projecting: The City currently has more revenue than expenditures in the Airport Fund. The excess over historical differences appears to be timing of receipting and expenditure of funds and will be analyzed as the year progresses.



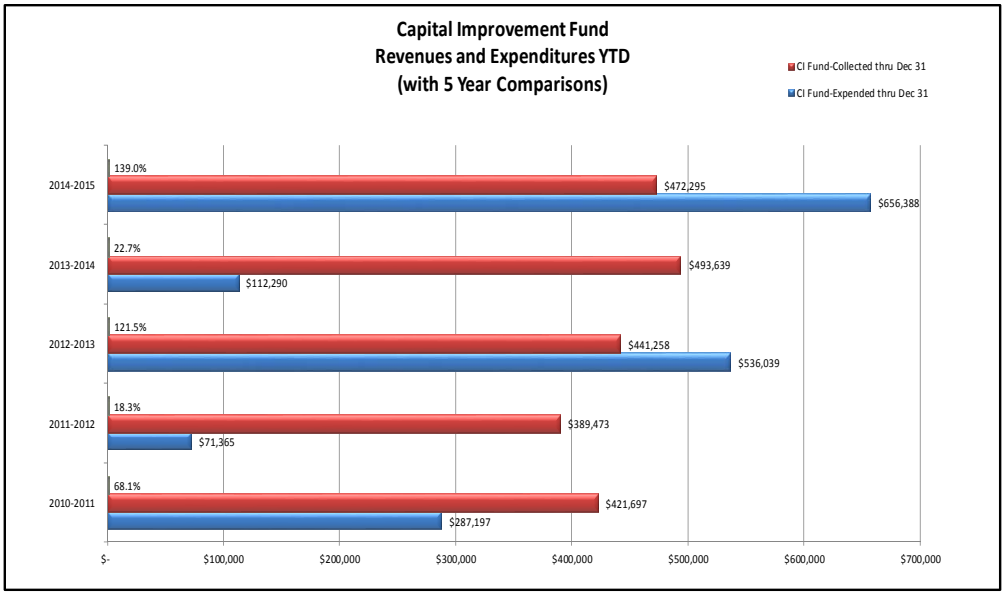
Capital Improvement/Special Project Fund Revenues

What we are seeing and projecting: The previous 4 year average of actual receipts in the CI Fund 3 months into the year is 23.0%. The City is currently at 15.7%. The revenue to budget is lower this year than the average because this year the fund had budgeted two sources of revenue, federal grants and impact fees, which will not be received. The expenditures relating to the anticipated federal grant will not be made. In the past a large part of the Capital Improvement Fund was funded with property tax dollars. However, this year most of the revenue will come from the quarterly State distribution.



Capital Improvement/Special Project Fund Expenditures

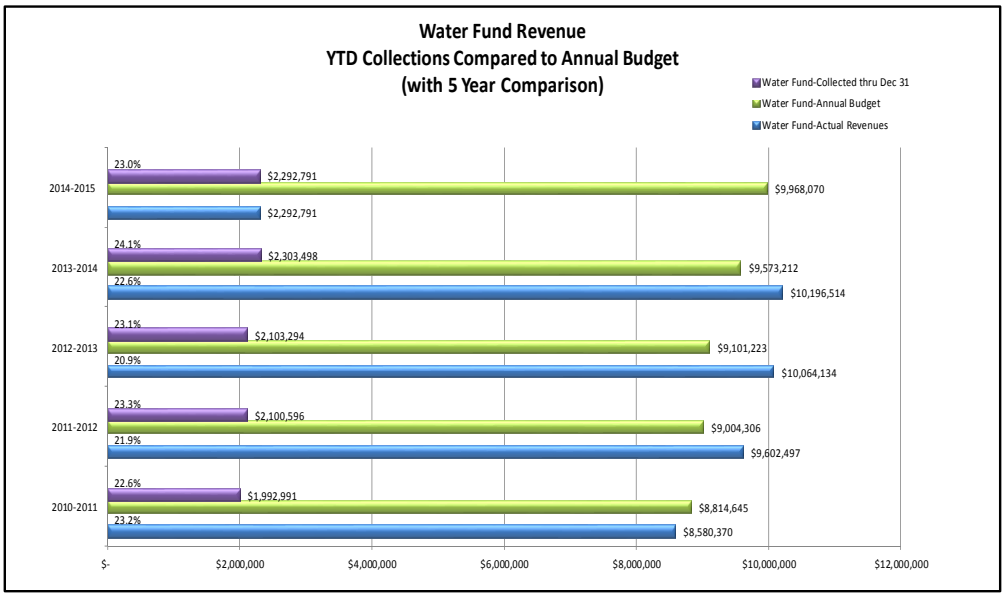
What we are seeing and projecting: The 4 year average of actual expenditures this time of year is 13.2% of budget. We are currently at 21.9%. Expenditures in the fund are one time disbursements for long lived assets and not cyclical. That gives some degree of control over the timing of when during the year those expenditures will be made. Some of the current expenditures were actually for budgeted and approved items in the previous year that have been encumbered and disbursed in this fiscal year. Fund expenditures are typically for the City's long term needs. The City is taking a conservative approach to expenditures within the fund, meeting critical capital needs.



Current Capital Impr Revenues and Expenditures

What we are seeing: Expenditures are ahead of revenues in the capital improvement fund.

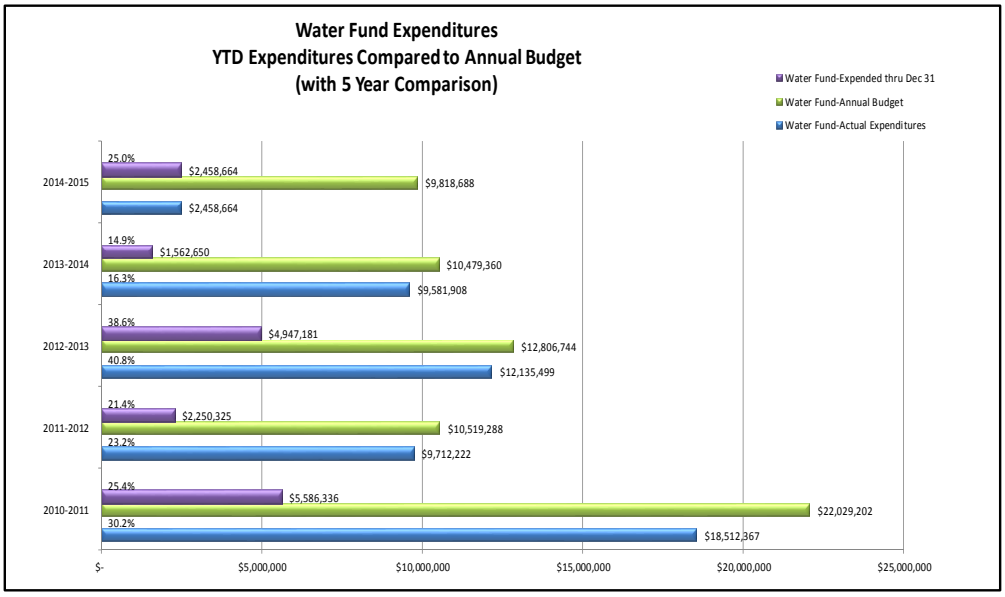
What this means: As mentioned above expenditures in the fund can be large and the timing a little erratic. Activity should come into balance near year end and will be closely monitored along the way.



Water Fund Revenues

What we are seeing and projecting: The previous 4 year average of revenue for the month of December is 23.3%. We are currently also at 23.0%.

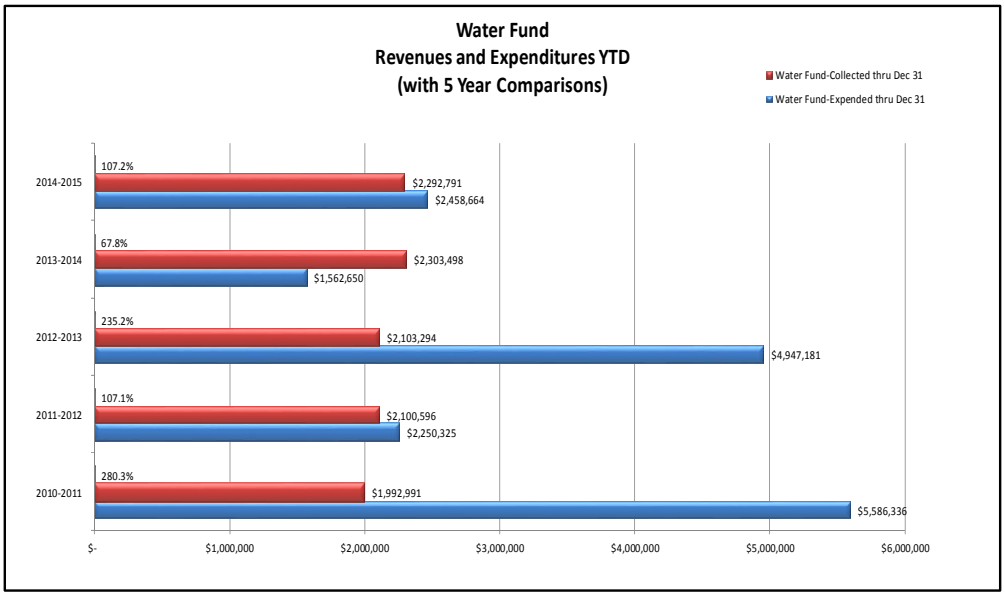
What this means: The City will closely monitor water user revenue to ensure we are able to meet all bond covenants in relation to the bond issuance in previous years. To date there are no issues.



Water Fund Expenditures

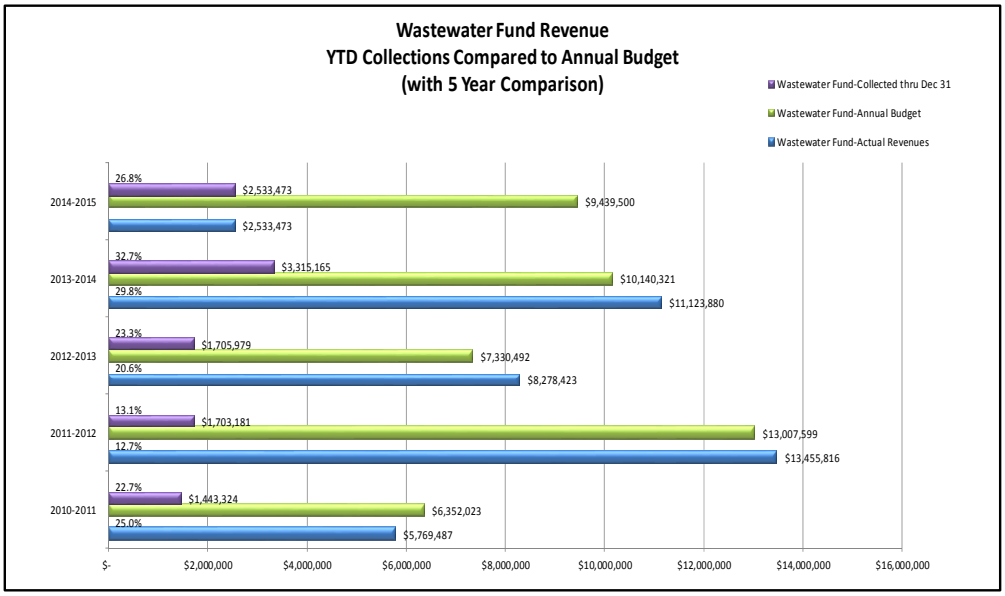
What we are seeing and projecting: The historical average is 20.6% of budget for this time of year. That excludes the 2012-13 year which is skewed because of an early pay off of debt. For 2014-2015, we are at 25.0%. A contributing factor causing the current year to be higher, than the historical average, is the City's activity in infrastructure projects to accommodate the needs of new industrial customers. These additional capital projects, although approved by the City Council, will require a budget amendment at some point.

Water Supply-27.3% spent YTD
PI-7.2% spent YTD
Water Distribution-24.5% spent YTD
Utility Billing-23.4% spent YTD



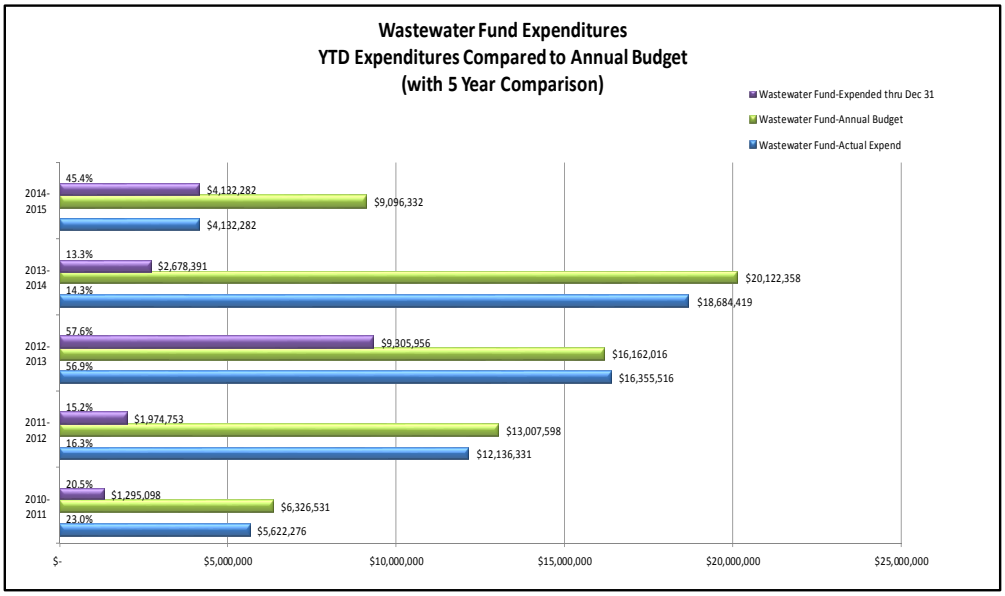
Current Water Revenues and Expenditures

What we are seeing: Currently, the Water Fund has received less than expended. This is typical for this time of the year when the City is heading into the winter months and landscaping irrigation is down.



Wastewater Fund Revenues

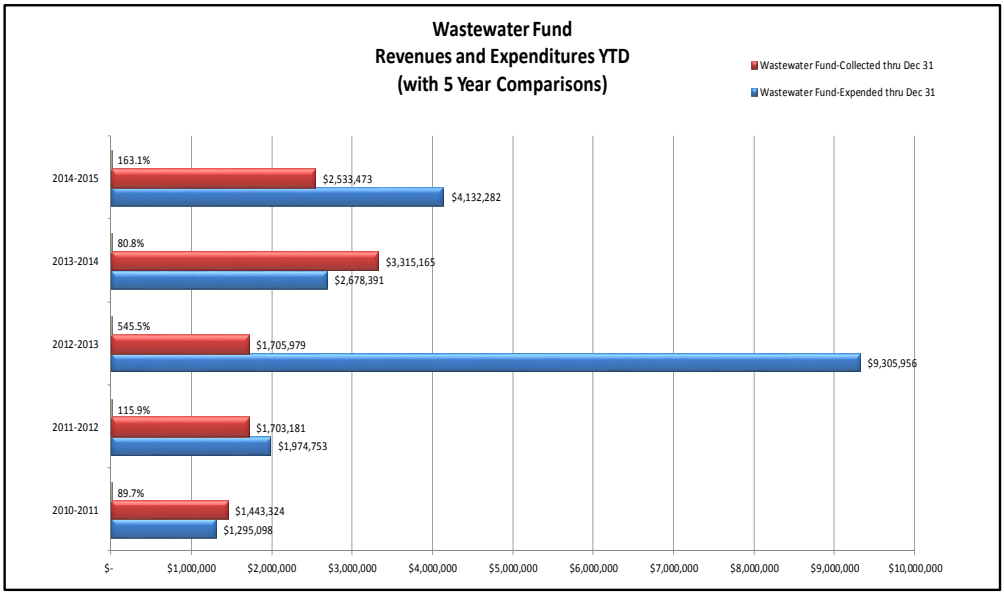
What we are seeing and projecting: The Wastewater Fund is at 26.8% three months, or 25.0%, into the fiscal year. The prior 4 year average of actual revenue for December is 23.0%. The City will closely monitor revenues variances in this fund, and adjust expenditures accordingly.



Wastewater Fund Expenditures

What we are seeing and projecting: Expenditures in this fund are at 45.4% of budget for the year. The historical average is 16.3% of budget for this time of year. That average excludes the 2012-2013 fiscal year, which is skewed because of an early pay off of debt. This year is higher than the historical average because the City is undertaking a significant expansion of its capacity at the sewer treatment plant. Funding has been secured for the project and expenditures have been approved by the City Council, but not yet included in the budget.

Collection-17.9% spent to date.
Treatment-54.1% spent to date.



Current Wastewater Revenues and Expenditures

What we are seeing: The Wastewater fund has more expenditures than revenues at this time of year. The size of that difference is not the typical case and is attributed to the treatment plant expansion mentioned above.
