

SNOWPLOW / SANDER ~ PRIORITIES FOR SERVICE

The following Priority #1 roadways will be considered to be SNOW ROUTES. During periods of heavy snowfall (> 2"), these roadways will be plowed / sanded in order of priority. The public is encouraged to not park on these roadways during periods of heavy snowfall and to be aware that we will generally plow towards the curbside of the roadway. We regret that some sidewalks and driveways may be covered during these operations. As per City Code we request that the Public not shovel their driveways or sidewalks into City streets or curb lines (City Code 7-1-16 Depositing Debris). Snow and ice piled and accumulated in curb lines only increases the potential for flooding and possible property damage.

During periods of continuous snowfall the following Priority #1 roadways will be plowed/sanded until considered safe for traffic, before moving on to Priority #2 roadways. The following roads are listed alphabetically and not in order of importance.

The City of Twin Falls Street Department is currently responsible for the maintenance of approximately 640 lane miles of City streets, serviced by 5 snowplow/sander trucks and 14 fulltime personnel.

PRIORITY # 1	Start point	End point
2nd Ave. E., W., N., and S.	All
